Experience

Graphic Designer + Printing Assistant

Right Marc Personalized Gift Shop, Jan '21 - September '22

Leading creative graphic designer to create designs for t-shirts, mobile covers, coffee mug and brand promotions for social media and prints. Also, my role is to print the design to transfer for different items mentioned earlier.

Freelancer

Created designs for website, social media post and catalogue and also 3d portraits for Tri Aayam - 3D printing services.

Made a vector portrait for a display picture for a gamer called pirate gamer.

Made a wallet card for a couple with a portrait silhouette.

Made a book cover for the story of a boy and girl who are from different backgrounds and feel for each other.

Certificate

Google UX Design Certificate Program

At present I have enrolled for the certificate program for Google UX Design on coursera platform. I have completed the first two courses called "Foundation of UX design" and "UX Design Process - Empathize, Define and Ideate". Getting ahead for third one "Build Wireframes and Low Fidelity Prototypes" out of seven.

UI/UX Specialization

At present I have enrolled for the UI/UX Specialization course offered from California Institute of Arts. I have completed the first two courses called "Visual Elements of User Interface Design" and "UX Design Fundamentals". Getting ahead for third one "Web Design - Strategy and Information Architecture" out of four.

Projects

Eatummy Food App

Adobe XD, Sept'21 - Nov'21

Created a food app design for project submission in coursera certificate program of California arts course for UX fundamentals. This app leads users to the best Indian cuisine restaurants nearby. This app is for those people who like to taste multi cuisines and want to explore. Eatummy allows users to select locations and find the restaurants and also users can search via his/her cuisine. Eatummy has a feature to book a table at a restaurant and also users can order food at home.

BetaMG Website Home Page

Figma, March '22

Redesign the homepage for the nutrition startup called BetaMG. Client wants to change the theme colors and look of the website to feel friendly and colorful with some catchy content to display.
